

Cut your corrugated costs... *dramatically!*

Meca-Pac case formers and packers are taking the Canadian market by storm

Characteristics and advantages
of Meca-Systeme/SNP machines

Case Erector
Type: BTM DP12

Entirely mechanical machine • Production capacity: 1,000 to 1,300 b/h
Flat capacity: 1,260 x 1,260 mm • Setup time: 10 to 30 min.

Olymel Flamingo

“We are proud to be associated with a company that is ahead of the curve, and which has helped us to improve our operations over the last 8 years.”

—Gilles Simard, Director of Purchasing.

Verger St. Paul Inc.

“Their equipment keeps us ahead of the competition.”

—Roland Lafont, President.

Case Erector
Type: BMF 20.5

Entirely mechanical machine • Production capacity: 900 to 2,800 b/h
Flat capacity: 800 x 800 mm • Ideal for production lines

“The recent installation of Meca-systeme trayformers on four of our major packaging lines has already resulted in a major reduction of board use, as well as streamlining of the type of trays we use at the plant.”

—Dominic D'Amours, Liberte Brand Products.

“We're saving about 30% on corrugate by using our new Meca-systeme case former.”

—Alex Fontaine, Montpak International.
